TO THE MEMORY OF

PROFESSOR RUDOLPH E. BRÜNNOW

WHOSE CONTRIBUTIONS TO ASSYRIOLOGY

HAVE SO GREATLY HELPED ALL SCHOLARS,

THIS VOLUME IS RESPECTFULLY DEDICATED

PREFACE

In the spring of 1917 the late Professor Morris Jastrow, Jr., of the University of Pennsylvania, called my attention to a large collection of cuneiform tablets which are kept in the Library of Princeton University. The bulk of the documents had been presented by the late Professor Rudolph E. Brünnow, this being augmented by gifts from other alumni and friends of the University, viz., Messrs. Sheldon Franklin, Robert Garrett, Kenneth Campbell Kirtland, Cyrus Hall McCormick, John Leverett Moore, Russell Wellman Moore, Charles Allen Munn, Richard Wayne Parker, Moses Taylor Pyne, Simeon H. Rollinson, Martin Dasher Wylly, and Miss Edith Ward.

As a result of a correspondence between Professor Jastrow and Professor Richardson, the Librarian of Princeton University, I was asked to prepare a catalogue of the entire collection. This was soon completed, but its appearance has been greatly delayed on account of the war.

As a quick perusal of the catalogue will show, the Princeton Library Collection is chiefly composed of documents of the Ur Dynasty. The three chief sources of tablets of that period, Telloh, Yokha and Drehem, are almost equally represented. Some of the specimens, and especially those from Telloh, are of a remarkably large size and find their counterpart in those from the same site now preserved in the Berlin Museum. Very remarkable also is a collection of unopened case tablets from Umma, which are perfectly preserved and covered with splendid seal impressions. Lastly, the Princeton Library is fortunate in possessing a group of about sixty seal cylinders gathered by the late Dr. W. H. Ward, the eminent authority in this field.

The Library authorities felt that at least a portion of such material should be placed at the disposal of scholars. Accordingly, I have gathered in this volume all of the largest Telloh documents and some of the

best Yokha texts. If conditions permit, this volume will be followed by others, until all the texts of any importance shall have been published.

I am very much indebted to Professors E. C. Richardson, J. T. Gerould and H. B. Van Hoesen, of the Princeton Library, for having done so much to facilitate the preparation of this volume. To my beloved teacher, Professor Morris Jastrow, Jr., whose sudden death has caused such a great loss to science, I shall never be able to fully express my thanks both for the active interest he took in this special work, and for his constant help and encouragement.

EDWARD CHIERA.

INTRODUCTION

The documents here published belong to that class of temple accounts which have enabled us to form a very clear knowledge of the life and conditions of a very distant past. In the 23rd and 24th centuries B. C. a great civilization had already developed in Southern Babylonia. This flourished especially under the shadow of the great temples, which had become the centers of both civil and religious life.

Enormous quantities of offerings of the most varied character were daily brought to the temples. These gifts were not all voluntary offerings and some were more or less disguised imposts. A strong force of scribes kept strict account of all that was brought in and of all the expenses incurred. Ledgers were kept in which, at the close of the month or of the year, the scribes carefully noted what was received and paid out. An account was also kept of the wages paid to a large army of laborers, weavers, flour-grinders, etc., men, women and children. The large tablets published in this volume are specimens of these old Babylonian ledgers.

But the scribes, in their endeavour to keep account of all receipts and expenses, were confronted by the impossibility of using a tablet for a continuous record of all transactions as soon as completed. As is well known, the old Babylonians used to write on soft clay, on which they impressed their characters by means of a wooden stylus. A clay tablet could not be kept moist for an indefinite period and the scribes, thus limited to using a tablet while it was soft, had to use separate tablets for marking down all their entries and expenses as they occurred. They also had to prepare separate receipts for all expenses incurred. All these memoranda and receipts were carefully stored away, into specially constructed baskets, to which clay labels were attached. At the end of the month or of the year, a "ledger" was prepared, in which all the individual transactions were carefully noted, and general totals added. In some instances, in spite of the great care exercised by the scribes, some receipts were lost or mislaid. In such a case the ledger had an entry (*e.g.* Text 17, Col. II) : "One talent, 25 manas of wool: there is no receipt".

It has already been stated that many of the gifts which the temples received were more or less of the nature of imposts: it was therefore

in the interest of the giver to obtain a regular receipt. These receipts were carefully drawn and, while the tablet was still soft, were enclosed in clay envelopes and duly sealed.

It is to this last class of receipts and small accounts that the majority of the tablets found in the temple archives of Telloh, Yokha and Drehem belong. The latest and most complete discussion of the documents from Drehem has been given by L. Legrain: Les Temps des Rois d'Ur (Paris, 1912). The tablets from Yokha (ancient Umma) have been studied by G. Conteneau: Contribution a l'Histoire Economique d'Umma (Paris, 1915). A very important collection of Telloh tablets, now in the Berlin Museum has been published by G. Reisner: Tempelurkunden aus Telloh (Berlin, 1901).

The character of the large tablets from Telloh in the Princeton Library and of those now in the Berlin Museum is identical. Since in both collections the large tablets are fragmentary, it is quite likely that some fragments in the Princeton collection will turn out to be portions of tablets in the Berlin Museum.

TRANSLATION OF SPECIMEN TEXTS

In selecting special texts for translation, I have endeavored to offer a representative group of the different types of documents. Since it would have been manifestly impossible to give the large tablets in their entirety, only the first column has been translated together with the last column, which furnishes a general summary of the whole document.

ANNOTATIONS

This document from Telloh is strikingly similar to VA Th 2422, published by *Reisner, Tempelurkunden*, No. 173. To this same kind belong also In II (*Inventaire des Tablettes de Telloh*, Vol. II) 970 and 3503; HLC (*Barton, Haverford Library Collection*) pl. 92, No. 96; pl. 104, No. 175; pl. 124, No. 268; *Nies* (*Ur Dynasty Tablets*) No. 41; CT VII, 47, 17775.

It is noteworthy that most of the special expressions and names of objects occurring in this document are found only in other tablets of the same special kind. In the annotations below I have given only the most important variants, leaving out such instances in which the documents agree. For other accurrences of *iá-ka-lum, in-ṣar-ṣar*, etc., I simply refer to the tablets above quoted.

l. 11. In II, 970 and 3503 omit *gi-íl* and have *ê-še-pa(g)-ga XX-a-bi, i.e.*, "one man for every twenty animals."

The *íl* is a porter. In documents of this same period we find this designation in connection with a number of different things such as

plants, *ú-íl,* In II, 790; RTll (*Reisner, Tempelurkunden*) 146, II, 15, *pass.;* straw, *im-nu-íl,* RTll 2, III, 7, *pass.;* fishes, *ǵa-íl,* VS XIV, 24, V; wood, *giš-íl,* present volume, 11, III, 26, etc.; *erû*-wood, *giš-nu-nu-íl,* In II, 970; Nies, 41; clay, *im-íl, Thureau-Dangin, Récueil,* 173, Obv.; milk, *ga-íl,* HLC pl. 52, 2,11; flour, *zid-íl, kal zid-íl,* HLC pl. 49, No. 19, IV; RTll 149, Rev.; finally the unknown cereal often mentioned in this group of tablets, *in-ṣar-ṣar-íl,* HLC pl. 104, No. 175 Rev.

l. 12. HLC pl. 92, No. 96, reads: *ê-gud-gaz ê-KA+ŠU-šá-saḫar-^{d}da-gan* and *ê-gud-gaz nibru^{ki}.*

l. 14. *Lugal-ra-uš-sa* "second to the king", very probably "next to the best quality", *i.e.,* "second quality". It must refer to some kind of beverage, because HLC p. 124, No. 268, has the variant *kaš lugal-ra-uš-sa.* This is also mentioned in 3, III, 14 of the present volume.

l. 15. HLC pl. 124, No. 268 reads *gú-peš esir-ra;* In II, 970 and 3593 omit *esir.* HLC pl. 104, No. 175 reads *gú-peš gub-ba.*

l. 16. Phonetic writing. *Níg-gú-na* = *unutu* (Br. 12029). *Giš-kin* = *kiškattu* (SAI 4033). VA Th 2422 adds to this line: *gír-su^{ki}-ta.*

l. 18. In II, 970 reads: *níg-ka-dé ê-gal* "for the beverages in the palace". In II, 3503 and HLC pl. 104, No. 175 read: *níg-ka-dé ê-gal gub-ba.*

l. 19. Oil was mixed with dates, thus forming a nutricious paste (Cf. *Conteneau, Umma,* p. xxxvi). In *Reisner's Tempelurkunden* (Index) we find the *gi-pat iá-ka-lum,* which is a reed basket used to hold this product.

l. 20. *Zid-ǵar-ra* occurs again in this volume, 2, I, 12. In II, 970 and others omit this line and substitute *zid-a-tir.*

l. 21. *Ǵa-sar* is of difficult interpretation. In III, 5338, not belonging to this group, reads: *I kal ud-VIII-šù mà-ǵa-sar gíd-da* "One laborer, for eight days, assigned to the long *ǵa-sar*-ship". Since it is not very probable that a "long ship" could be used in a fish-pond, it would appear as if the *ǵa-sar* would be something denoting the cargo of the ship. The *sar* is probably the determinative for "herb, grass" and *ǵa-sar* appears to be some vegetation called "fish-grass".

l. 22. *Reisner's Tempelurkunden* 121, III, 17; VI, 13, *pass.* has *in-ṣar,* a product which is measured in *gurs,* probably some kind of cereal. In a list of articles of food (CBS 11082, found in Nippur) *in-ṣar* is mentioned, and is immediately followed by *in-ṣar-ṣar.* HLC pl. 104, No. 175 has the variant *in-ṣar-ṣar-íl.*

l. 23. VA Th 2422 after *ki* adds *a-ka-a.*

l. 27. VA Th 2422 omits *lugal.*

	ê ur-^{d}ba-ú-ta	from the house of *Ur-^{d}Bau.*
	5 udu ê ur-mes-ta	5 sheep from the house of *Ur-mes.*
	31 udu 1 máš	31 sheep 1 kid
10.	*ê lù-^{d}nin-gir-su-ta*	from the house of *Lu-^{d}Ningirsu.*
	šunigin 60+50+7 udu	Total: 117 udu
	šunigin 1 síl	Total: 1 lamb
	šunigin 6 máš	Total: 6 kids.
	šunigin 1 máš-ga	Total: 1 sucking-kid
15.	*60×2+5*	(Grand total) 125,
	ê-udu-bil ba-an-túr	which have been brought into the new sheepfold.
	38 udu 6 síl	38 sheep, 6 lambs
	1 máš	1 kid
	ê-udu uš-gíd-da-ta	(which) from the sheepfold of *Ush-gidda*
20.	*ê udu ê-gal-ka ba-an-túr*	to the sheepfold of the palace have been brought in.
	60×2+40+2udu 8 máš	(Grand total) 162 sheep, 8 goats.
	600+60×5-lal-2 udu 60 +50+7 máš	(In the stables already were) 898 sheep and 117 kids
		(Which, with the totals of l. 21, make)
	600+60×9+40+5	1185,
	ê-udu-bil ù ê-udu-ê-gal	(now in) the new sheepfold and in the sheepfold of the palace.

ANNOTATIONS

L. 5. After *ur-^{d}nun-gal* we should have expected the postposition *ta*. This is a scribal error.

l. 11. In this total of 127 *udu* are also included the 79 *uz* of l. 6. Cf. following note.

l. 13. In this total of 6 *máš* are also included the 4 *uz* of l. 3. This shows the terms employed are not used with a very precise meaning.

l. 21. The eight *máš* correspond to the 6 on l. 13, plus one *máš-ga* (l. 14), plus one in l. 18.
